GemBox Support Center

Support for background image in charts Completed

- TB Thomas Brown
- **Forum name:** #GemBox.Spreadsheet Feature Request

When using an XLSX file as a template and saving as a PDF, preserve the background image in a chart.

Currently, if you use an XLSX file as a template and save as a PDF, the background image is not preserved.

I have the same issues at the moment. If I want nice looking charts, I have to create them in the software and insert them as an image into the excel file in order to have any control over chart formatting. please implement this.

Hi,

This feature request has been implemented and is available in the latest versions of GemBox.Spreadsheet.

Regards,

Mario
