Support for cross axis in charts New

- Chris Roffe
- Forum name: #GemBox.Spreadsheet Feature Request

I want to reverse the order of the bars compared to the original data. This can be solved in Excel by setting:

- Format Axis > Categories in reverse order
- Format Axis > Horizontal axis crosses at maximum category

For the first option, I can use <u>ChartAxis.ReverseOrder</u> property, but there is no cross-axis property.

Please could you add this functionality to GemBox.Spreadsheet.
