Support for reading PDF files Completed

- Mario at GemBox
- **Forum name:** #GemBox.Document Feature Request

Add a support for loading PDF file format into DocumentModel.

Seems logical that if we are able to produce PDFs, we should be able to read/load them as well.

A feature I would need. Any updates on the topic so far?

Mario at GemBox

Hi, PDF reading is a much more intensive task than PDF writing and actually, we first want to improve the support of existing formats. Please note that one of the options that we think about in the long term plan is implementing a PDF reader, however, since it is a very extensive task you should not expect this feature to release in the next year (unfortunately even though we do realize it is a high demanded feature). Regards, Mario

The ability to merge multiple PDF documents would be great.

Hi, This feature request has been implemented and is available in the latest versions of GemBox.Document. Regarding the merging of multiple PDF documents, for this, you should consider using GemBox.Pdf instead. Regards, Mario
