What are redistribution requirements?

Mario - GemBox - 2017-12-27 - 0 Comments - in Licensing questions

You can redistribute all files marked as "REDISTRIBUTABLE FILES" in the product documentation. However, your end customers must be informed that they should not distribute those files further. Notice that we issue unique serial keys, so if a serial key is reverse engineered and pirated, either your end-customer (if he was informed of redistribution requirements) or you (if you failed to inform them) will be liable for damages.

You can download GemBox products' EULAs from the following links:
