Add file type autodetect from stream Completed

- IK Ivan Kudyk
- Forum name: #GemBox.Spreadsheet Feature Request

I write to you to ask if it is possible to add the overload of Load() method described here:

 ${\tt https://www.gemboxsoftware.com/spreadsheet/docs/GemBox.Spreadsheet.ExcelFile.html\#GemBox_Spreadsheet_ExcelFile_Load_$

that would take Stream as input, without LoadOptions.

Since you can auto-detect file type for a file under a particular path String overload, I wonder if you could provide a similar service for Stream overload in a reasonable time. The same counts for Document, for which I have a purchased license, too.
