GemBox Support Center

Add new option for barcode generation Declined

- WT Wagner Tiburtino
- **Forum name:** #GemBox.Document Feature Request

Hello,

I'm from Brazil and the National Federation of Banks uses the "interleaved 2 of 5" standard in bank slip payments and we would like it to be added to the barcodeType options in the CreateBarcodeField functionality of the GemBox.Document.

As reference documentation, follow the attachment 4008-524-0121-layout-cobranca-portuguese-version.pdf which cites the standard "interleaved 2 of 5" on page 24/55.

Thanks.

Hi,

I don’t see a usage of “interleaved 2 of 5” barcode in the provided PDF, am I missing something?

Anyway, can you send us a DOCX file that uses this barcode so we can investigate it?

Regards,

Mario
