GemBox Support Center

Add support for PDF encryption Completed

- MG Mario - GemBox
- **Forum name:** #GemBox.Pdf Feature Request

Currently other GemBox components (except GemBox.Pdf) have a support for encrypted PDF files, see:

- GemBox.Spreadsheet's PDF encryption example
- GemBox.Document's PDF encryption example
- GemBox.Presentation's PDF encryption example

This feature request is for adding the support for PDF encryption in GemBox.Pdf as well, **so that input PDF files can be saved as encrypted output PDF files**.

This feature will be really helpful. This is very common scenario in today's world to read/process documents which are password protected.
