## Add support for PDF encryption Completed

- Mario at GemBox
- **Forum name:** #GemBox.Pdf Feature Request

Currently other GemBox components (except GemBox.Pdf) have a support for encrypted PDF files, see:

- [GemBox.Spreadsheet's PDF encryption example](#)
- [GemBox.Document's PDF encryption example](#)
- [GemBox.Presentation's PDF encryption example](#)

This feature request is for adding the support for PDF encryption in GemBox.Pdf as well, **so that input PDF files can be saved as encrypted output PDF files.**

This feature will be really helpful. This is very common scenario in today's world to read/process documents which are password protected.

Hi,

This feature request has been implemented and is available in the latest versions of GemBox.Pdf.

Regards,  
Mario
