Help Center > Community > GemBox.Pdf Feature Request > Add support for PDF encryption

Add support for PDF encryption Completed

- MG Mario GemBox
- Forum name: #GemBox.Pdf Feature Request

Currently other GemBox components (except GemBox.Pdf) have a support for encrypted PDF files, see:

- GemBox.Spreadsheet's PDF encryption example
- GemBox.Document's PDF encryption example
- GemBox.Presentation's PDF encryption example

This feature request is for adding the support for PDF encryption in GemBox.Pdf as well, so that input PDF files can be saved as encrypted output PDF files.

This feature will be really helpful. This is very common scenario in today's world to read/process documents which are password protected.
