GemBox Support Center

Add Table Support In PDF Document New

- MH Mohammad Kamrul Hassan
- **Forum name:** #GemBox.Pdf Feature Request

Greetings,

yes, i know i can use your word/document component to use table, but it would be more elegant and useful feature if you guys can kindly add table creation support in pdf library.

full table support, like with header, rows, columns, merging rows, column, auto height, etc etc.

hope that make sense?

thanks in advance

best regards
