GemBox Support Center

API support for table styles Completed

- MG Mario - GemBox
- **Forum name:** #GemBox.Document Feature Request

Request for adding API support for table styles.

GemBox.Document supports table styles (Plain Table 1, Grid Table 1 Light, List Table 1 Light, etc.) only through the preservation in DOCX file format, but they are not directly supported by GemBox.Document API.
This means that any table style name used to format our Table element in our DOCX file will be preserved when we load this file with GemBox.Document and save it back to a DOCX format, but they are not directly supported by GemBox.Document API.

More information about GemBox.Documents's preservation can be found on the following link:

https://www.gemboxsoftware.com/document/docs/preservation.html

Hi, This feature request has been implemented and is available in the latest versions of GemBox.Document.
Regards, Mario
