GemBox Support Center

Enhance GemBox.Document content model Completed

- MG Mario - GemBox
- **Forum name:** #GemBox.Document Feature Request

Make a new model for GemBox.Document which would support fields spanning over multiple paragraphs/tables.

Better resolution of headers/footers (add genuine support for link to previous).

NOTE: Introduction of a new content model would also mean that some other parts of a current API would be deprecated / obsolete.

Hi,

This feature request has been implemented and is available in the latest versions of GemBox.Document (see the Field.InstructionElements and Field.ResultElements).

Regards,

Mario
