Gradients in shapes Completed

- MB Morten Bogh
- **Forum name:** #GemBox.Document Feature Request

GemBox is not able to render shapes with gradients as image or PDF files.

The attached image shows a Word document (left) with three shapes inserted with different coloured gradients.

Here you can see the resulting rendered image (right).

I have also attached a copy of the word document with the shapes with gradients.

Hi,

This feature request has been implemented and is available in the latest versions of GemBox.Document.

Regards,

Mario
