## Insert and Retrieve Metadata Details New

- RV Ray Victorell
- **Forum name:** #GemBox.Imaging Feature Request

We would like the ability to insert and retrieve metadata inside the image.

Metadata - IPTC, XMP, EXIF and People Tagging Comprehensive methods and properties have been included to read and write metadata stored in JPEG and TIFF images. This includes IPTC text stored in both the older IIMV4 and newer XMP formats, EXIF data, XP Summary Data and Microsoft People Tagging. Metadata can be written directly into the JPEG header using the OverwriteMetaData method to avoid the need to recompress an image.
