Power Point to Video Export New

- John D sa
- **Forum name:** #GemBox.Presentation Feature Request

This is a request to export a video from PowerPoint.

We have tried all possible libraries available in the market which deal with office products however non provides the feature to export a video from PowerPoint.

We used the Office Interope library to do the PowerPoint to video export. However, it takes a lot of time like 3-5 minutes. Additionally, it takes a huge amount of CPU progressing power, making it practically impossible to use in a production environment.

We the entire developer community would be thankful if we could get this feature done.

This will enable a whole new experience of using the Gembox and help include innovative business ideas with this feature.

Hi John, I'm sorry to say that this feature is not in our current roadmap so it won't be done this year. For later I cannot say at this moment. Please note that we prioritize feature requests by the number of users requesting them and currently we're working on some other features that have greater priority. Regards, Mario
