Print Options Declined

- Robert
- **Forum name:** #GemBox.Spreadsheet Feature Request

Would like to be able to "Save Entire" workbook in .xlsx format. this option is available with the Save("") to pdf. This way, when spreadsheet is opened, and on the Print tab in Excel the option would show entire workbook?

Hi,

Unfortunately, this information is not stored in the XLSX file.

There is no way to indicate to some Excel application that an opened file should have a selection set to the entire workbook.

Regards,

Mario
