Saving to PDF with Pivot table Duplicate

- MT Mai Tri Thien
- **Forum name:** #GemBox.Spreadsheet Feature Request

Hi All, I have the processing flow by following: - First, I create an workbook within pivot table. - Then, I wanna save it into pdf format. While its saved, I hope the pivot self changed data source before (make sure that pivot has been refreshed). - Finally. I open this document, the pivot has already data. Your sample does not match in this case. Does your APIs support? Please help me. Thanks all.
