spline chart Duplicate

- MV Matteo Visca
- **Forum name:** #GemBox.Spreadsheet Feature Request

I have a necessity to use a create a file with a lot of spline charts but when i try with yours library i found out it is not possible. this type of charts are not available.

Hi, Spline or curved charts in Excel files are called X Y (Scatter) charts, with the "smoothed line" option enabled. Note that we already have this feature request in our feedback collection and please feel free to vote for it in order to increase its priority: https://support.gemboxsoftware.com/community/view/scatter-charts-api-support
