Support for background fill as picture when saving as PDF. Completed

- I Ioshchikhes
- **Forum name:** #GemBox.Document Feature Request

I need a Support for background fill as picture when saving as PDF.

As workaround for new Word documents or templates an image element can be used instead. However, customers have a large number of existing Word documents that may not be changed.

Hi,

This feature request has been implemented and is available in the latest versions of GemBox.Document (see the [PictureFillBrush](#) docs page).

Regards,

Mario
