Hi, this is a powerful excel functionality and necessary for me to be able to report and analyze

parent-child relations, having 2 or more related tables in the same pivot-table allows users to compare and show in the same chart meaningful information.

I hope this feature gets implemented any time soon.

Thanks.

Hi,

I need this functionality, me too :).

thanks

Hi,

This feature request has been implemented and is available in the latest versions of GemBox.Spreadsheet.

Regards,

Mario
