Support for IF field update outside the mail merge process New

- Gabriel de Figueiredo
- **Forum name:** #GemBox.Document Feature Request

Currently IF field is updated only when used together with merge fields, so inside a mail merge process.

This request is for adding an IF field update support for IF fields that are not used in mail merge.

For example: { IF { PAGE } = { NUMPAGE } "Last page's content" "Other pages content." }
