## Support for IF in Word Templates Completed

- GerhardKainz
- **Forum name:** #GemBox.Document Feature Request

In order to empower End-Users to taylor their mailings based on business data we would like to see support if Word IF-fields during mail merge with gembox. So that an Expression like {IF «Commitment\_Type\_Key» = 200 "two hundred" "not 200"} will result in variable text after mailmerge according to the value of «Commitment\_Type\_Key»

Hi,

This feature request has been implemented and is available in the latest versions of GemBox.Document.

Regards,  
Mario
