## **Support for IF in Word Templates Completed**

- G GerhardKainz
- Forum name: #GemBox.Document Feature Request

In order to empower End-Users to taylor their mailings based on business data we would like to see support if Word IF-fields during mail merge with gembox. So that an Expression like {IF «Commitment\_Type\_Key» = 200 "two hundred" "not 200"} will result in variable text after mailmerge according to the value of «Commitment\_Type\_Key»
