Support for PDF/A Completed

- Mario - GemBox
- **Forum name:** #GemBox.Document Feature Request

GemBox.Document support generating only standard PDF files.

Request for supporting a PDF/A file format so that we can generate or convert input files into an output PDF/A format.

Does PDF/A support vector images?

Mario - GemBox

5 years ago

Hi,

Yes PDF/A supports vector images, just like the regular PDF does.

But unfortunately GemBox.Document currently does not convert vector image formats to PDF vector graphics (but rather to PNG).

However if/when GemBox.Document does add a support for this conversion, it will be available for both PDF and PDF/A format (after a support for it has been implemented).

Regards,

Mario

It would be great if GemBox Document supported Tagged PDF documents and included auto-tagging based on headings, etc. as it is converted from Word/HTML. Also necessary is access to other settings like the ability to set the initial view of the PDF to make a fully accessible PDF.

In particular it would be great to create a PDF/A-1b compliant PDF file.

Hey GemBox-Team,

are here any news about PDF/A? I would like to use this.

Nico

Hi,

I'm afraid there are no news regarding PDF/A support.

This feature is not in our current road-map so it won't be available this year and for later I cannot say at the moment.

Regards,

Mario

Hi,

This feature request has been implemented and is available in the latest versions of GemBox.Document.

Regards,

Mario
