Does PDF/A support vector images?

MG **Mario - GemBox**

9 years ago

Hi, Yes PDF/A supports vector images, just like the regular PDF does. But unfortunately GemBox.Document currently does not convert vector image formats to PDF vector graphics (but rather to PNG). However if/when GemBox.Document does add support for this conversion, it will be available for both PDF and PDF/A format (after support for it has been implemented). Regards, Mario

It would be great if GemBox Document supported Tagged PDF documents and included auto-tagging based on headings, etc. as it is converted from Word/HTML. Also necessary is access to other settings like the ability to set the initial view of the PDF to make a fully accessible PDF. Mark Bajema Emergent Software

In particular it would be great to create a PDF/A-1b compliant PDF file.

Hi, I'm afraid there is no news regarding PDF/A support. This feature is not in our current road-map so it won't be available this year and for later I cannot say at the moment. Regards, Mario

Hi, This feature request has been implemented and is available in the latest versions of

GemBox.Document. Regards, Mario
