GemBox Support Center

Support for saving to image format in .NET Standard 2.0 Completed

- I Ihor
- **Forum name:** #GemBox.Pdf Feature Request

GemBox.Pdf for .NET Standard 2.0 does not support image saving.

Environment: .NET 5 running with a Docker

Add cross-platform support for this feature with the .NET Standard version of GemBox.Pdf.

I have an urgent need for the ability to convert PDF pages to images and save to files in a .NET 6 or .NET Standard 2.0 project that will be hosted in Azure App Service too. If this is not possible using GemBox then we will need to find and pay for another 3rd party product to perform this function because we have very tight timeline to deliver into production by August 1st. Thanks, Mike

Hi Mike, we do plan to add cross-platform support for saving to image format. But I'm afraid that won't be available by August 1st. Regards, Mario

Hi Mario, We are in need of saving document to image as well. Is this update available? We are on Linux w/ Gembox.Document v3.3. Thanks, Allan

Hi Allan, this feature is still not available. However, note that we do plan to introduce this feature in the next roadmap. But at the moment I don’t have any release date to share.

Unfortunately, nothing has changed. We're still working on some other features with greater priority.

Hello, I tried GemBox.PDF to convert PDF to Image on Linqpad and it is working great on Net 7.0 However, when I am using it on razor pages, also on Net 7.0 , and console app. I get the message below. GemBox.Pdf for .NET Standard 2.0 does not support image saving. but it's not .Net Standard 2.0

Currently evaluating your product... it's a non-starter without a Save option for DotNet Standard 2.0 - any idea of progress?

Hi,

This feature request has been implemented and is available in the latest versions of GemBox.Pdf.

Regards,

Mario
