Support for TextBox elements in HTML Completed

- Michael
- **Forum name:** #GemBox.Document Feature Request

TextBox elements do not convert to Html properly. We have cases where documents with hyperlink data on TextBoxes are incorrectly rendered with the TextBoxes missing entirely.

We would like this functionality implemented as soon as possible as we are seeing issues where the font gets changed when we convert word to html.

Hi,

This feature request has been implemented and is available in the latest versions of GemBox.Document.

Regards,

Mario
