Support for Visio drawing objects (and other embedded OLE Objects) Completed

- Dimitrios Smyrnaio
- **Forum name:** #GemBox.Document Feature Request

The original problem was that Visio drawing objects disappear when document gets saved using GemBox. I tried to save to PDF from DOCX file.

Hi,

In the current latest bugfix version of GemBox.Document we have introduced basic support for rendering some OLEObject elements in output PDF files.

Regards,

Mario
