GemBox Support Center

Support rotated characters when printing Completed

- AR Alex Ramsey
- **Forum name:** #GemBox.Spreadsheet Feature Request

Gembox uses the same rendering engine to print or saving to a PDF. This engine does not handle the text that is rotated in the worksheet. Currently Gembox ignores the Rotation property during saving as PDF or printing to a printer. We would like this feature so that we can print our rotated text correctly. That way, the print engine provides more of a WYSIWYG type output.
