TextBox content: VerticalAlignment Completed

- Daniel
- **Forum name:** #GemBox.Document Feature Request

For text inside a TextBox: It would be nice to have the possibility to set the vertical alignment to 'center' or 'bottom' if required (in addition to the default 'VerticalAlignment.Top').

For example as a property of the 'TextBoxFormat' Class, it seems there is already a private field that reflects the vertical alignment (0,1,2) when reading a document.

Hi,

We have now exposed this as a public API.

You're now able to use `TextBox.TextBoxFormat.VerticalAlignment` property to set the desired vertical alignment.

Note that this is available in the latest publicly released bugfix version.

Regards,

Mario

Great !

Thanks a lot.
