GemBox Support Center

TextBox / TextBody Support Completed

- BW Benedikt Walter
- **Forum name:** #GemBox.Spreadsheet Feature Request

Hello,

since a long time I create XLSX-files with an other SDK. But my customer wants this generated XLSX-files as a PDF, so I use GemBox.Spreadsheet to convert them to PDF.

In the process of generate this XLSX-Files TextBoxes are put above pictures with the description of the picture in it. The pictures and Textboxes are outside the grid, so I can't use cells instead. The XLSX-Files look how it should, but in the converted PDF-Files are the TextBoxes missing.

I want to ask for supporting TextBoxes or an other way to write a description for a picture that is outside the grid.
