## Track Changes (DOC, DOCX) - support All Changes and No Changes views Completed

- M Mark
- **Forum name:** #GemBox.Document Feature Request

We would like to be able to set an output flag whether to show All Markup or No Markup (all changes accepted).

And, also the ability to extract a separate file with the change log (date, add|delete, author). The data is present in the document format, but would need to be extracted

We would like to set flag to enable/disable tracking mode of docx,when we import docx file through GemBox.If any tracking markup is available,and track mode is enabled the tracking changes should be highlighted.
